M - F	9:30	9:33	9:39	9:41
M - S	10:00	10:03	10:09	10:11

1 A schedule consists of a “route map” and a “timetable”. It shows when and where Link Transit buses go to different areas of our community. Each of these areas has been assigned a route number and for each route a schedule is provided. The map also shows the location and travel direction of the bus route.

2 Timetables show times the bus begins the route, travel past a certain location (timepoint) on the route, and the time the bus will arrive at the end of the route. In general, most routes operate once every hour. Also, some routes operated a different schedule on Saturdays than Monday through Friday. Be sure to check for the day you are riding.

3 “Timepoints” shown at the top of each timetable are also shown on route maps. For example, Columbia Station is a timepoint and shown as a **T** on both the route map and timetable.

4 The time the bus passes by each timepoint location is shown in the timetable.

5 If your stop is in between two timepoints, use the timepoint prior and be prepared to wait a few extra minutes. The bus may arrive early at the timepoint, but it will not depart until scheduled.
